

HIPPO: How Individual learning Pathways are Possible for Offenders

The Grundtvig Learning Partnership HIPPO aims to facilitate the reintegration of offenders into society and labour market through the development of individual learning processes in prison education.

The partnership is based on the co-operation of eight organizations from six European countries who will exchange their experience, knowledge and practice related to prison education and will provide strategies for an improved reintegration of (ex)-offenders.

HIPPO is financed by the EU-Programme "Lifelong Learning" (Grundtvig)
